

Abigail Ward
Homework 2

- a) My database will be about the European Cup. There are the individual teams with country names, wins, losses and ties and coaches and playing for each team are players who have names, age, goals or assists and a regular season team. There are stadiums to play at which have locations. Lastly there are games played by two teams that requires information such as score, yellow cards and date.

b)

c)

The *PlayerSubstitution* function would end the minutes for the current player in the game and start the minutes for the new player in the game.

The *TeamElimination* function removes the team from the round
